High Leverage Concreters' Nipper

High lever transmission

- 25% less effort required compared to conventional concreters' nippers of the same size
- Extra-slim form for tying deep mounted steel rods
- To lace concrete reinforcing steel with binding wire from a roll
- Wire is twisted and cut in a single pass
- High-leverage joint, minimising strain, even when thick binding wires are used
- The high damping of the cutting stroke on cutting through the binding wire reduces the strain on tendons and muscles
- Cutting edges additionally hardened; cutting edge hardness approx. 61 HRC
